

Lancement/Launch: Francophone Roundtable & Welcoming Communities Project

Join representatives of Waterloo-Wellington-Guelph's French-speaking community and French-speaking health care professionals for the launch of a Regional Roundtable and the Welcoming Communities Project.

The WWG Francophone Roundtable promises to maximize the efforts of francophone organizations in the region by bringing them together for project coordination and resource-sharing.

The Welcoming Community initiative, its first joint project, will identify, welcome and connect French-speaking health care professionals and students to create opportunities for community involvement, networking and internships. Otherwise, we lose this precious, bilingual resource to larger centres where francophone health care professionals have more opportunities to live and work in their mother tongue.

Join us and community leaders at this important event.
